

The return to work requires some planning, let Videk help with any cables/adapters/extensions required.

Adapting the workspace

Social distancing will mean moving desks and workstations for most businesses whilst still providing all the resources your workforce needs. This might require longer versions of existing cables as well as ways to provide power in new areas.

Longer Network Cables

Devices placed further away from existing data points will need to be connected to the network.

More Power Cables & Extensions

As offices are re-organised additional power cables and extensions may be needed.

Better Power/Data to Desk Solutions

For convenient access to power and data better solutions to provide these to users may be necessary.

Staying safe

Our workspaces are going to look and feel very different. Keeping the workspace safe will require effective cable management, especially in areas where there may be exposed cabling as a result of distancing measures.

Rubber Floor Trunking

To help avoid the hazard of trips and to protect exposed cabling from damage floor trunking will be essential.

Additional Cable Ties & Conduit

Effective cable management can extend the life of an installation whilst making the workspace more comfortable.

Under Desk Cable Trays

Raising cables from the floor can help make the workspace more comfortable whilst also avoiding damage to cabling.

Maintaining operations

With new devices in the workplace there will be a need for adaptors and cabling to connect with existing systems and equipment.

Display Adaptors & Convertors

New or additional displays alongside new or existing laptops or PC's will lead to adaptors being required.

New Monitor & AV Cables

As screens are repositioned with users or new displays are deployed additional cabling will be necessary.

Computer Cables & Adaptors

Where the workspace is re-organised users may require cabling and adaptors to access peripherals.

New ways of working

As we adapt to the "New Normal" many employers will evaluate how their workforce is distributed. Traditional office space will evolve as companies adopt agile working practices with a combination of remote workers and on-site staff.

Screen Mounts in an Efficient Workspace

Screen configuration is a key element to enabling users to work creatively and productively.

Creating an Ergonomic Workspace

A safe and comfortable environment where the workspace is tuned for productivity works to the benefit of the user and the organisation.

Better Power to Desk Solutions

In an agile workspace it is critical to ensure convenient access to power and data wherever it is needed.
